7500 Willow Springs Road
Building Addition/Modification
LaGrange Illinois

Mueller & Associates, LLC (MA) in a joint effort with Randy B. Pruyin NCARB AIA teamed up to design addition to an existing 100 year old masonry structure. Special foundation underpinning conditions proved to be a challenge, as the existing building foundations were comprised of large stone rubble. Other building modifications included the addition of an elevator, second level pool and sun deck and structural modifications to the existing chimney

M&A provided the following services:

- Structural Engineering Design, Modeling & Analysis for additions to the existing building
- Assistance during construction
